SKILLS & INTERESTS

Skills: JavaScript, Vue.js, Vuetify, Nuxt.js, Node.js, Vitest, React, Redux, Ruby, SQL, NoSQL
PostgreSQL, Heroku, AWS; HTML, CSS; Git, GitHub, DevOps

WORK EXPERIENCE

GCOM Software

Remote

Contributing member of RevHub tax analytics - a comprehensive SaaS based enterprise platform designed to implement operational algorithms for federal and state tax and improve user experience.

Software Developer III

February 2023 - present

- Led a cross-functional team, overseeing software project development and delivery.
- Conducted code reviews, provided technical advice to junior developers and ensured adherence to coding standards and best practices.
- Mentored junior developers, fostering their technical and professional growth, and guiding them to excel in their roles.
- Refactored the existing accounts page by reorganizing the data structure and utilizing code splitting & preloading techniques. Resulting in readable, maintainable, and testable code.
- Successfully integrated automated testing with the Vitest framework, resulting in improved code reliability and maintainability. This reduced manual testing time and mitigated the risk of errors in production.
- Improved layouts, spaced out links, and utilized a readable font to create a mobile-friendly version of the application.

Software Developer II

August 2022 - February 2023

- Collaborated with the back-end team on multiple projects resulting in clearer and more robust connections between frontend components and API calls.
- Successfully built robust functionality enabling users to effortlessly save, modify, and delete search filters. The saved searches list updates in real-time, ensuring a seamless, responsive user experience.
- Utilizing the third-party Zingchart library to improve data visualization using charts and graphs.

Software Developer I

Oct 2021 - August 2022

- Developed reusable and modular components showcases my understanding of component-based architecture. Resulting in maintainable code, saving developers time and reducing the risk of errors and inconsistencies.
- Wrote RESTful APIs, and successfully integrated them with the frontend. Ensuring proper data exchange and API response handling.
- Collaborated on cross-functional Agile development methodology, such as Scrum, to deliver high-quality digital solutions in an iterative and incremental manner.

EDUCATION

Belarusian State University

Belarus

- Minor in Computer Science, BS in Public Relations
